

### **Sports Flooring Installation Technician**

Matéflex is the oldest U.S. modular tile manufacturer. We've been doing this since 1974 and we keep finding new ways to do it better. Attention to detail and dedication to rigorous standards make our snap-together tiles a high quality solution for many applications. We oversee all aspects of the manufacturing process, are committed to using the finest materials, and continually refining the manufacturing process to achieve the highest possible standards.

#### **Job Description**

We are seeking an aggressive, energetic candidate who is looking for a unique opportunity that likes to travel and work directly with customers in the field. Primary duties will include directing, supervising and installing modular sports flooring both indoors and outdoors. When not working in the field, the candidate would be assisting in setting up courts to paint game lines and custom logos in our warehouse. Other duties could include inventory oversight of finished goods, tools and installation supplies, coordinating shipments, and helping to maintain a clean work space. Additional duties and opportunities are available depending on experience.

The successful candidate must have good mechanical skills, the ability to work independently and accurately measure out and install large sports floors such as basketball, tennis, volleyball and inline hockey, including game line painting and custom logos. An unrestricted driver's license and willingness to travel overnight are mandatory. Travel may be extensive during peak seasons but most projects are complete within a normal work week with weekends off. Travel expenses are fully paid. Relevant work experience is preferred but we will train.

#### **Duties and Responsibilities will include:**

- Directing, supervising and installing modular sports flooring
- In house game line and logo painting on our surfaces
- Inventory oversight
- Coordinating shipments
- Company paid travel will be required

#### **Personal Requirements**

- Strong work ethic
- Good mechanical skills
